CLOGS

A VALUABLE BOOKLET FOR ALL WHO BUY, WEAR OR STOCK CLOGS

Points for Consideration

1. Clogs are a British Production, produced by British Labour from British Materials.

2. Clogs are the best Footwear for Out-door Workers. The solid base given by the Clogs prevents tired feet after a day's hard work.

3. Clogs are durable and more safety is assured to the feet of men employed in dangerous trades, e.g., Miners, Glass Workers, Chemical Workers, Forgemen, Quarrymen, Stokehold Firemen, etc. Clogs will stand the rough usage of these and similar trades.

4. Clogs are Ideal Footwear for Industrial Workers, and will stand the strain of wearers who have to kneel and rise from that position.

5. Clogs are generally fitted with Irons, but they can be fitted with Leather, Rubber or other Material to suit the purchaser.

The DERBY CLOG

The Footwear for the Worker

The most popular and comfortable Clog for Workmen in the Heavy Industries. Made 5 in. to 7½ in. high, as required. Hardwood Clog Soles, fitted with Irons and Toe-plates. Watertight Uppers made from Waxed Split or Grain Leather give Footwear which is equal to all rough and wet work.

Can be fitted with Safety Capills for protecting the toes of men engaged in mines, quarries and foundries.

Specially suitable for :—Workmen in Bottling Stores, Breweries, Laundries and Waterworks. Quarrymen. Iron, Steel and Gas Workers. Miners, Builders, Labourers. Tar Sprayers. Road and Rail Workmen. Men employed in Agriculture and Dairies. Slaughterhouse and Chemical Workers.

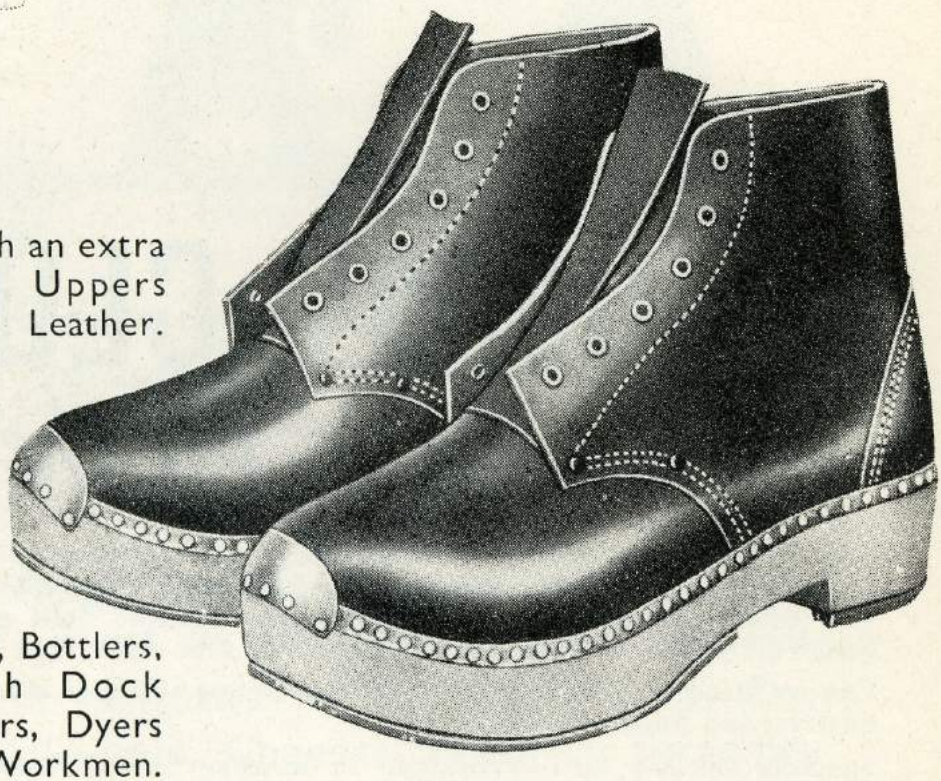
Made in Three Classes as required :—

(*a*) Fitted with Full Watertight Tongues.

(*b*) Fitted with Half Watertight Tongues.

(*c*) Fitted with a Loose Tongue.

The BREWER'S CLOG



Here is a Clog with an extra Heavy Sole and Uppers made from Good Leather. It is Copper Bound and Tipped, which add considerably to its value.

Specially suitable for :—

Brewery Workers, Bottlers, Fishermen, Fish Dock Workers, Bleachers, Dyers and Sewerage Workmen.

Mens BLUCHER CLOG

This Clog is made with Strong Hard-wood Soles. Uppers made from Stout Waxed Split or Grain Leather. Double Toe-plates and Ironed.

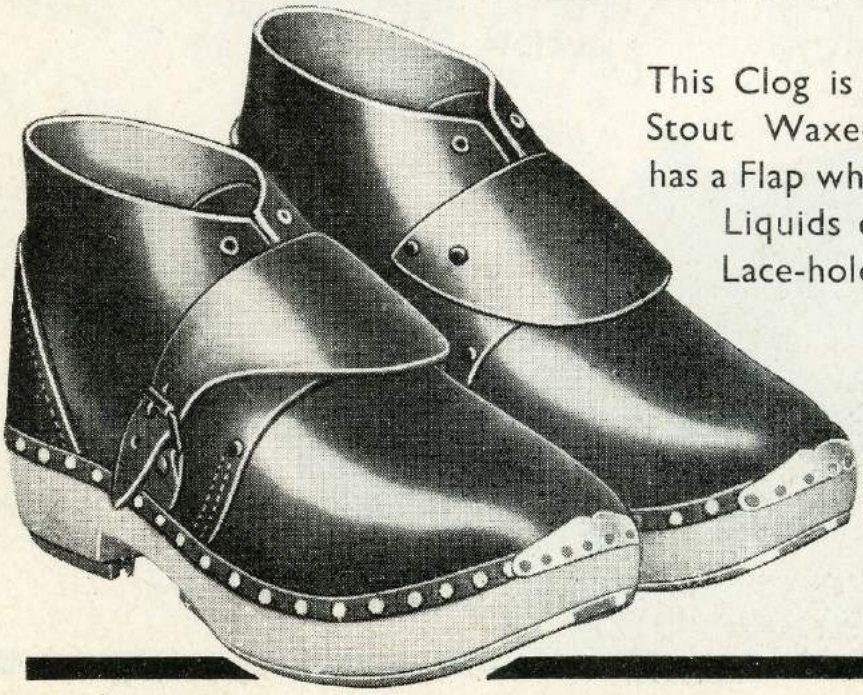
This is the recognized Clog for the Mining Industry, and most acceptable for men employed in Dyehouses. Steel and Tin Plate Workers speak highly of this Clog as being very suitable for their work.

The WELLINGTON CLOG

This Clog is made 10 in. to 14 in. high, as required. with Uppers made out of Grain and Waxed Split Leathers.

A most useful Clog, worn by Men and Women in Agriculture and at Garages, when washing Motor Cars, Vans and Lorries.

The FLAP & BUCKLE BLUCHER



This Clog is usually made with a Stout Waxed Split Upper, and has a Flap which prevents splashed Liquids entering through the Lace-holes.

Regularly used in Bottling Stores, Breweries, Chemical Works, Laundries and all Wet Trades.

The ONE BAR CLOG

This style has always been popular in Lancashire and Yorkshire with women who like a smart Clog.

The Uppers are often made out of coloured grain leathers and if put on to a light sole this can be a very attractive Clog.

A SPECIALITY FOR WOMEN & GIRLS

INDISPENSABLE IN COTTON AND WOOLLEN MILLS

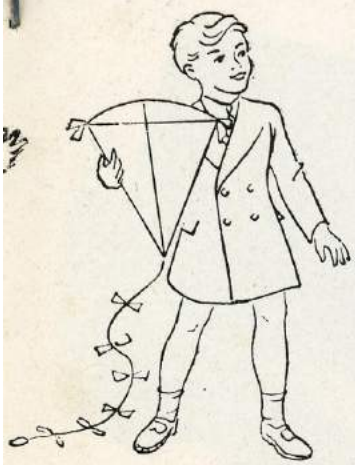
The CLASP CLOG

This is probably the oldest style and is still popular with Clog Wearers of all ages.

The Clasp Clog is very handy for slipping on and off.

With this Clog good wear is assured for Workers in Cotton and Woollen Mills and specially in Laundries, also for Children at School and Play.

Every Woman should have a pair of these in the home. On washing days and for swilling they keep the feet out of the wet. When mopping floors the rigid wood sole keeps the foot in a natural position and enables a woman to do her work with ease.



The BALMORAL CLOG

The height of this Clog ranges from 3¼ in. to 5½ in., according to size. Uppers are chiefly made from Black and Coloured Grain and Waxed Split Leathers.

POPULAR IN COUNTRY DISTRICTS FOR WOMEN, BOYS, GIRLS AND CHILDREN

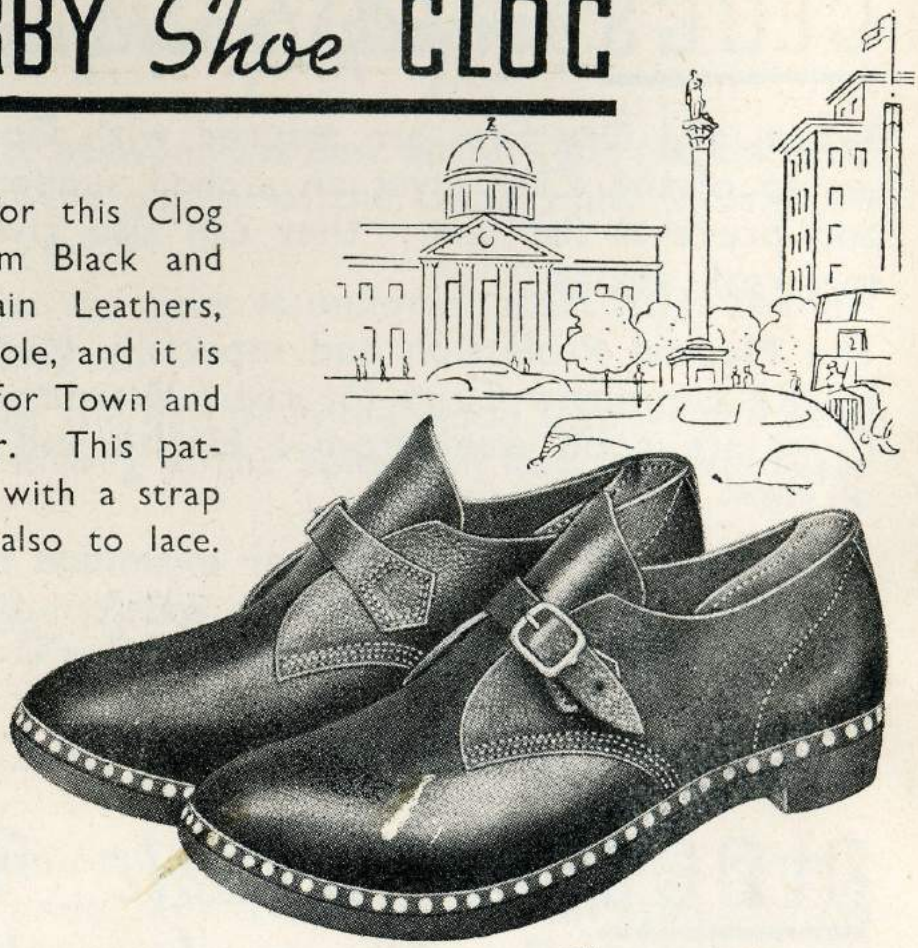
FELT LINED 2 BUCKLE

A most useful Clog for Men and Women who have to spend time in the Garden.

A warm and comfortable Clog which can be supplied with or without Irons.

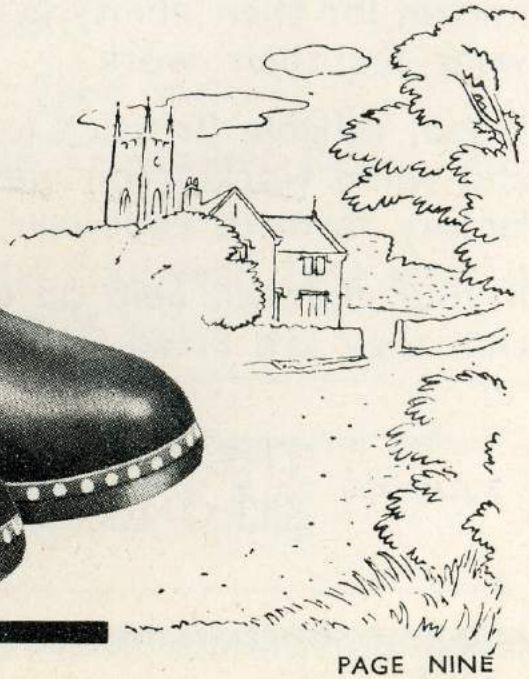
The DERBY Shoe CLOG

The Uppers for this Clog are made from Black and Coloured Grain Leathers, with a Light Sole, and it is most suitable for Town and Country Wear. This pattern is made with a strap and buckle ; also to lace.



For Town and Country

It is a smart Clog in appearance ; gives adequate protection to the foot by its design, and is rapidly coming into favour with Women and Girls.



CLOGS *can help to Safeguard Health*

Warm and Dry Feet are assured with Good Clogs. The instep of the Clog gives an arched support for the foot, and prevents flat feet ; they can also give good support for weak ankles.

The Medical Profession and especially Medical Officers of Health commend Clogs for their Warmth and Reliability. Clogs are good wear from a Health and Hygienic point of view.

Some time ago a Head Master examined the footwear of a Class of Schoolchildren, and it was found that those who were wearing Clogs had warm, dry feet.

CLOGS *the Reliable Footwear for Agricultural Workers*

FARMING.—Agriculture and Gardening are the oldest and largest industries in the world, and the workers are known for their ability in selecting the most suitable Footwear for their work.

Good, reliable British Clogs are most suitable for digging, and when working on uneven land there is no more satisfactory form of Footwear.

If your children help on the Farm and in the Garden, see that they are fitted with Clogs.

THE STURDY FOOTWEAR FOR
STRONG, STURDY CHILDREN

HINTS *to Clog Buyers*

1. The difference between the Best Quality and the cheapest is entirely in the quality of the Uppers and Workmanship.
2. The quality of the Soles is uniform (apart from the few made by hand).
3. If required for the mill or home, good Uppers will keep their shape as long as the Soles will last, and will stand re-clogging.

HINTS *to Clog Wearers*

1. Keep your Clogs Ironed. Clogs without Irons deteriorate quickly.
2. To resist Damp, Clogs must be of the best quality. If you work under wet conditions it is advisable to have two pairs of Clogs—one pair drying off gradually, while the other pair is being worn ; this will lengthen the life of the Clog.
3. If you have a wet occupation, a regular dressing with Good Dubbin will help to keep the Leather Uppers pliable and in the best condition.
4. For additional comfort Wear Shoe Socks.
5. If you kneel at work, ask your Clogmaker to put Toeplates on your Clogs.
6. Clogs are the most Economical Footwear, long wear is assured at small cost for repairs.

The best place for stocking Clogs is a dry room with normal air circulation, and stockists will find that it is an advantage to unpack the Clogs as soon as possible after arrival.

CLOGS ARE NECESSARY FOR THE FOLLOWING:

MINES
Coal Mines
Lead Mines
Salt Mines
Iron Ore Mines

QUARRIES
Stone Quarries
Slate Quarries

PITS
Clay Pits
Sand Pits
